Polarimetry

Why sponsor IAUS 360?

International Astronomical Union (IAU) Symposium 360 is the international meeting that researchers and scientists from all over the world will gather and discuss advances in polarimetric technologies and applied techniques in the fields of astronomy and astrophysics.

We organizers expect an attendance of 150 participants, mainly researchers at universities, research institutes, decision makers, and young scientists in the fields. This is the first international symposium of the Astronomical Polarimetry series that is to be held in Asia in the history.

As an official sponsor, you directly contribute for growing fields of astronomical polarimetry that can be applied in various fields of sciences.

Your sponsorship will support participants from developing countries for travel costs, young scientists who may become a frontiers in the fields, and keynote speakers of the symposium.

IAUS 360 Astronomical Polarimetry 2020 — New Era of Multi- Wavelength Polarimetry

March 22 — March 27 2020

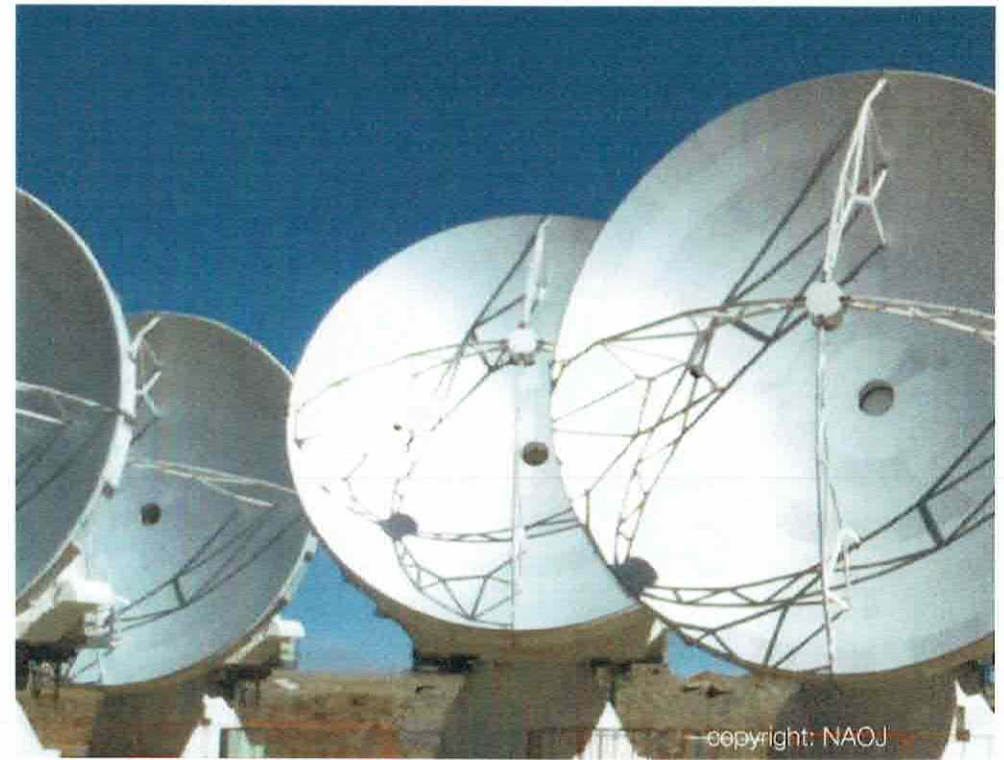

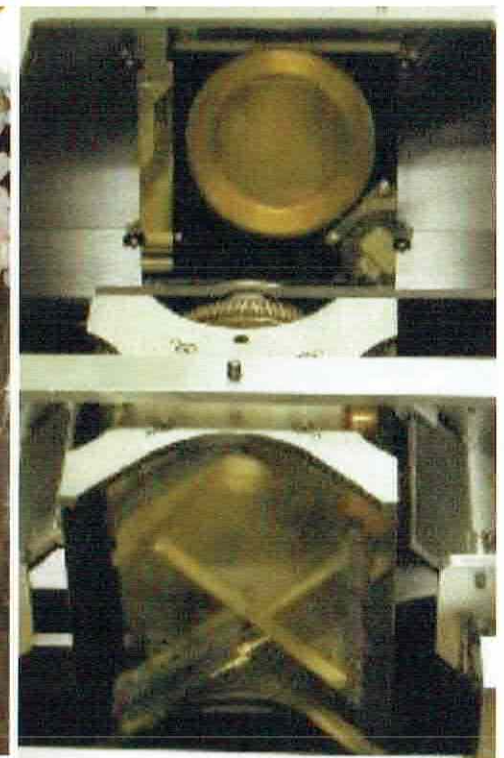

Hiroshima, JAPAN

Day 0: March 22, Sunday afternoon, Hiroshima
Children's Museum, Course of Astronomical
Polarimetry and data reduction

Day 1 through Day 5 (Monday — Friday)
Scientific Sessions

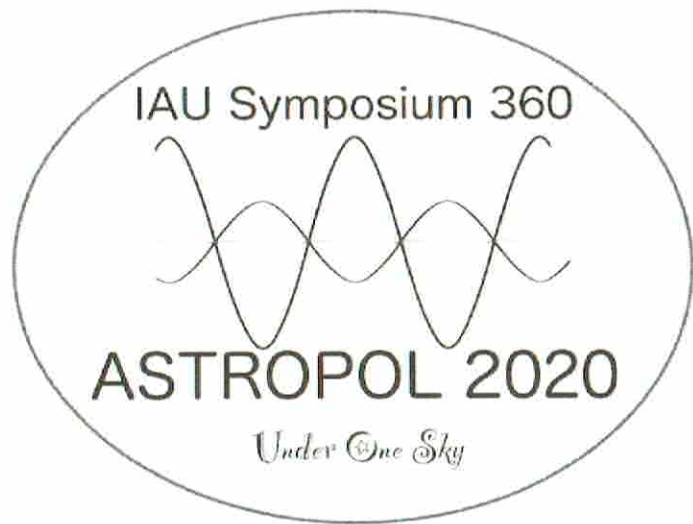

Day 3 Wednesday afternoon, Excursion

Day 4 Thursday, Conference Dinner

Sponsorship for IAUS 360

Benefit / Package	50,000 JPY Topaz sponsor	100,000 JPY Safire sponsor	200,000 JPY Diamond sponsor

IAU celebrates its 100th anniversary in 2019.

The centennial celebrations will stimulate worldwide interest in astronomy and science and will reach out to the global astronomical community, national science organisations, societies, policy-makers, students, families and the general public. The IAU 100th anniversary provides a wonderful opportunity to highlight to the world the fantastic science, technology and inspiration that astronomy has brought us over the past century.

Be part of the the International Astronomical Union (IAU) Symposium 360
Astronomical Polarimetry 2020.
